John@TheBillingsTucson.com | <https://thebillingtucson.LongRealty.com>

JANUARY 2017

Phoenix, Casa Grande, Yuma and the White Mountains all experienced a strong residential housing market in 2016. Increased sales along with less listing inventory in Phoenix resulted in a seller's market at many price points and a moderate increase in home prices. It's a function of supply and demand. Low interest rates and improved economic development in the area fueled housing growth and should continue to do so. Buyers may need to act quickly when purchasing and there is a new opportunity for homeowners who may be considering selling.

JANUARY 2017

As the housing recovery continues in Phoenix, the median price of home sales in Phoenix was **\$226,500** in December 2016, and **\$225,000** for all of 2016. Prices have recovered to January 2008 levels. This means that there is still opportunity for more home price appreciation before returning to the historical peak of 2006.

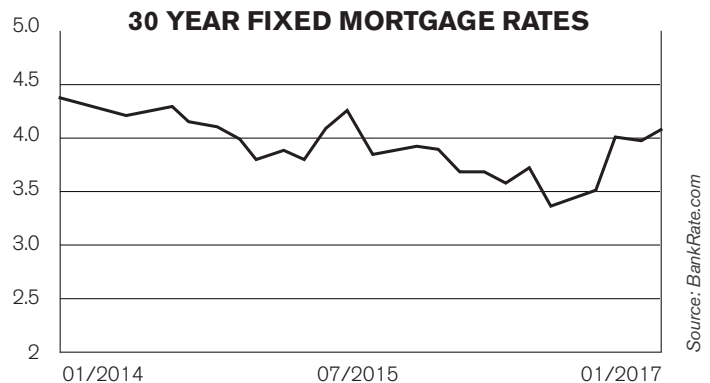

PHOENIX MEDIAN SALES PRICE

Area	2016	% Change 2016 vs. 2015	Trend
Phoenix	\$225,000	+8%	➔
Casa Grande	\$155,000	+8%	➔
Yuma	\$134,000	+6%	➔
White Mountains	\$155,000	+11%	➔

MORTGAGE RATES RISE SLIGHTLY

30 year fixed mortgage rates have risen recently, however still remain historically low at slightly over 4%. Monthly loan payment on a median priced home in Phoenix stands at \$1,074.

JANUARY 2017

High buyer demand and a shortage of listing inventory at price points below \$500,000 resulted in a seller's market, which means buyers may have a more difficult time finding a home and face multiple offer situations. Higher price points remain in a buyer's market. Market conditions can vary greatly by price point and geographic area, so always check with your Long Realty agent for what is happening in your area.

JANUARY 2017

MARKET INSIGHTS

2016 was a year of continued recovery for our local housing market. What's in store for 2017? While the future is never certain, we expect the factors that contributed to market growth in 2016 will continue into this year.

Rosey Koberlein
Long Companies CEO

EMPLOYMENT & ECONOMIC DEVELOPMENT

According to a recent *Forbes* article, Arizona is home to two of the metros with rapid employment growth on the horizon, per Moody's Analytics. Tucson is No. 5 at 3.3% annually, while Phoenix clocks in at No. 8 with a per-year average of 3.1%. Demographics and migration patterns in Arizona are favorable as baby boomers retire to warmer climates fueling real estate expansion along with hospitality gains. Arizona also has a relatively diverse private sector and offers a more affordable alternative to the high-priced business and living costs in California. Farmers Insurance announced plans this year to add 1,000 more jobs in Phoenix from its current 500. Phoenix has added nearly 20% more tech jobs over the past five years. Uber, Shutterfly and Yelp have all recently opened offices there.

MILLENNIAL HOMEBUYERS & AGING BOOMERS

While Millennials haven't purchased homes in force in past years due to recessionary conditions, tight mortgage lending criteria and high student loan debt, those trends are starting to change. Millennials in their 30's are starting families, and coupled with employment growth, are looking to become homeowners. In fact, according to a recent study, 65.3% of millennials associate the American Dream with buying a home – more than any other generation. As Millennials age, we expect an influx of home buyers. At the opposite end, aging baby boomers will be reaching retirement age and will create more home purchase and sale opportunities in Phoenix and central Arizona, a magnet for retirees.
